DRIVERS ASSIST FEATURE WITH FLEET ONLY OPTION

REVISION	UPDATE	REVISION DATE
	INITIAL RELEASE	16 / FEBRUARY / 2022

MODEL(S) AFFECTED:

2022 Model Year F59, and 2023 Model Year F650/750 & E-Series Cutaway

ISSUE / DESCRIPTION:

An orderable option is now available to set and lock certain Driver Assist Package features at the factory so that they cannot be changed by operators or fleet technicians once the vehicle is put in service. Figure 1 below compares the available settings and controls against the factory locked settings. Order codes for each vehicle are provided in Figure 2 below and in the vehicle Order guide. These order codes are a Fleet **Only** Option and can only be ordered when the customer has a valid FIN Code.

Settings are set at the factory per order and are locked in place and cannot be changed once the vehicle has been manufactured.

Lane Departure Warning and Auto High beam functions have a limited override while the vehicle is in operation but will reset to the on function once the vehicle key is turned off. This specifically helps when Auto High beams are affected by ambient weather conditions (heavy rain or fog)

	Feature	Sub-Level Features	Setting Selections: F59/E-Series CA/F-650/F-750 (Factory Settings in Bold)	Driver Assist Fleet Option
